JUNG
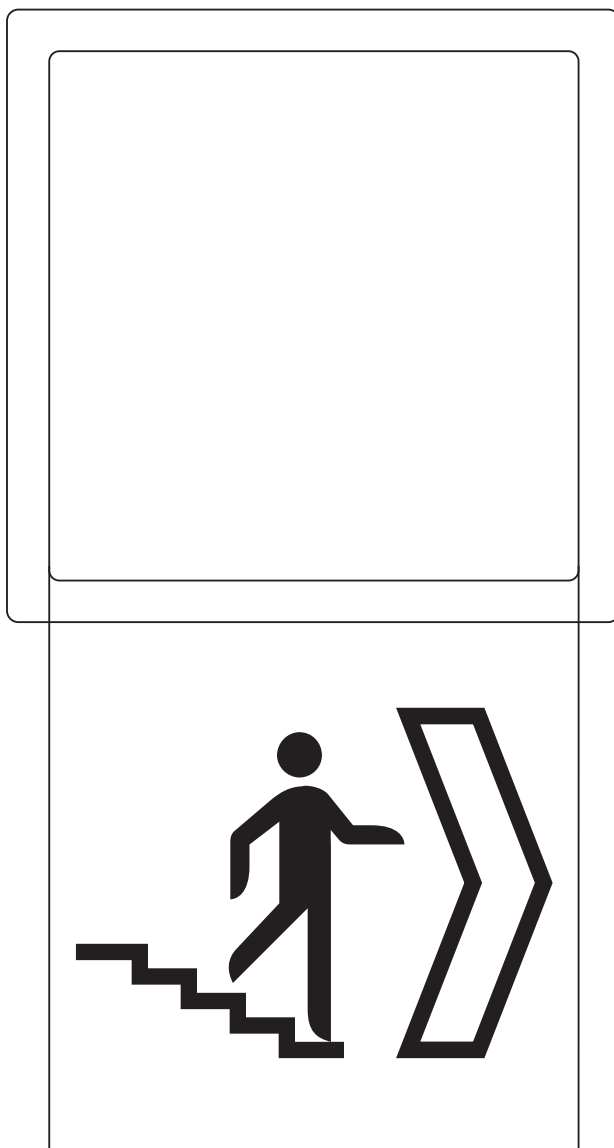

Order form for
LED info signs
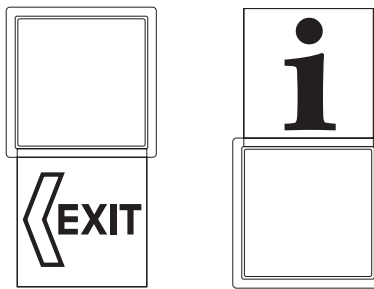

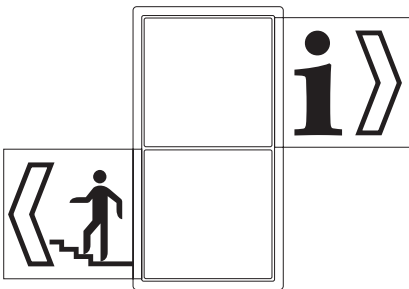

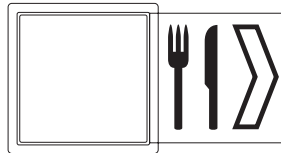

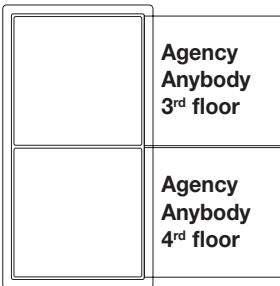

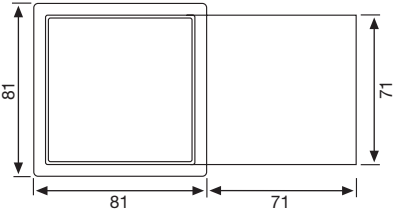

General information

The LED info signs are modular elements of the JUNG LED technology. They are used for information and guidance in buildings. The available sign format for wording is 71 x 71 mm. The LED info signs can be designed with individual text and symbols to provide buildings with consistent guidance systems.
JUNG offers a special wording service to label the sign as desired. Simply enter the text in the template to be found on the following pages of this order brochure. Standard symbols are available for various parts of the building, e.g. indicating where to find the stairs or the lift. Beside these options you can also send your required symbol in a vector file format e.g. generated with Adobe Illustrator. When making your order, please indicate the symbol number and the installation direction. Send the completed order form to your JUNG reseller.
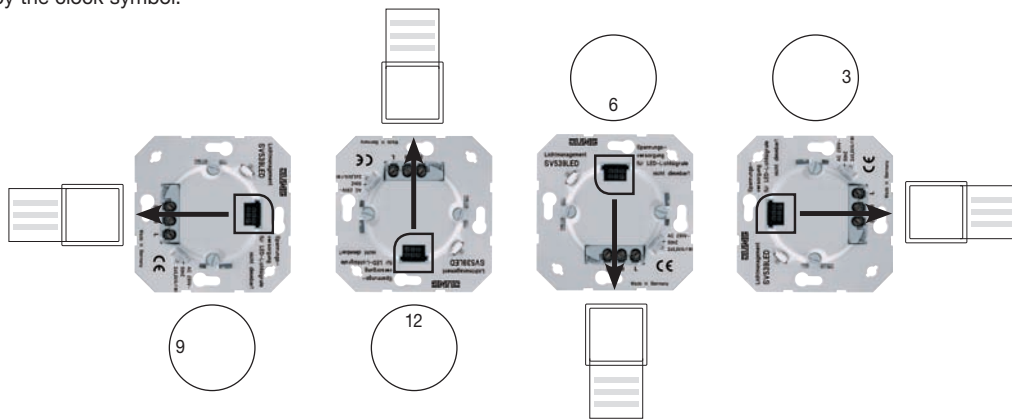

Examples of use:

Dimensions in mm:

81 / 81 / 71 / 71

Installation instructions:

When installing the flush-mounting insert, always pay attention to the required position corresponding to the direction of the sign. The four possible directions are shown by the clock symbol.

Choice of symbols:

There is a wide range of possible symbols for LED info signs. Please state the number of your chosen symbol in the order (see figs. 1 - 28).

Vector files:

If you want to send us your individually designed symbols or logos please send the symbol in a vector file format generated e.g. with Adobe Illustrator.
