

Wiha ComfortGrip T-handle.

Soft zones for maximum working comfort.

Side blade with through blade.

The new Wiha T-handle with through blade for additional side blade features soft zones for the comfortable transmission of high torques.

Due to their ergonomic design, these handles are comfortable to hold. Fewer pressure points and less strain on the user mean that these tools are a pleasure to use.

When using the side blade, a supporting hand on the handle produces additional stability, which prevents the blade from suddenly slipping out of the screw head. This is better for both blade and screw.

The hole in the handle can be used for shop storage.

No screw can resist. The powerful Wiha ComfortGrip is quick and comfortable to use and even loosens screws that have been glued into position.

A tool that is a pleasure to use. Using the side blade for even greater torque, a supporting hand stabilises the handle and prevents the blade from slipping.

Black soft zones in the handle for comfortable working.

Chrome-plated blade for optimum corrosion protection.

Wiha ComfortGrip T-handle.

- The integrated side blade is particularly useful when loosening or tightening screws that are rusted-in, glued into position or particularly hard to move
- The through blade withstands even the highest stresses
- Distinctive soft zones on the ergonomic handle for the comfortable transmission of even high torques
- Handle-size concept with three handle shapes designed for maximum ease of use and for applying just the right amount of torque
- The new colour-coding system for the handles couldn't be clearer:
Red: metric hex blades
Green: TORX® profiles

Wiha ComfortGrip.

Soft zones for maximum working comfort.

For Allen screws (metric).

540DS Hexagon ball end screwdriver with ComfortGrip.
With side blade.

Blade: Chrome-vanadium steel, through hardened, chrome-plated.
Handle: Wiha ComfortGrip, the comfortable multi-component T-handle with soft zones for maximum working comfort.
Application: For comfortable high torque transfer. Especially useful for loosening or tightening screws that are hard to move.
Specially for hard-to-reach screws.
Extra: One piece blade, through the handle withstands even the highest stresses.
The ball end enables the user to work at angles up to 25°.
