

Wiha ErgoStar.

Fastening on to something good.

reddot design award

Silber 2011

Extremely agile: the new ball end now enables fastenings up to an angle of 30°.

The trick with the new Wiha ErgoStar is as simple as it is effective: rotating a single L-key in the holder means that all other keys rotate to the side at the same angle! That means: there's no more complicated disentangling of adjacent keys any more. All L-keys are ready for removal with a single turn, quicker, more simply and more clearly than ever before.

But easy removal is not the only advantage. The set of Wiha premium L-keys from the series 369S is also included. With the new ball end design, screws can be effortlessly fastened even at an angle up to 30°. Through-hardened, chrome vanadium steel and high quality brilliant chroming are further convincing reasons that make the L-keys essential accessories for everyday work.

The right idea: a flowing movement means all L-keys are ready for removal.

Wall holder for practical storage of the Wiha ErgoStar: all keys always ready to hand. Available together with the Wiha ErgoStar in all display and blister pack versions.

Wiha ErgoStar.

- Innovative key extraction: One turn and all L-keys are rapidly and conveniently ready for removal
- Quick replacement of keys in the holder thanks to a solid stopping point
- Guaranteed firm fixing of keys over the complete life service
- Up to 25% more corrosion resistance thanks to high quality brilliant chroming
- Metric scale (SW 10) in range 20 – 150 mm

For Allen screws (metric).

**369S** Ball end hex L-key, long.

Blade: Chrome vanadium steel, through-hardened, brilliant chrome-plated.
 Standards: Based on ISO 2936L.
 Application: Especially for screws that are difficult to access.
 Extra: The ball end enables fastening and unfastening at an angle of up to 30°.
